Project Highlights

Sprinkled with several rejuvenating elements, the bounties of nature are showered in abundance upon Adarsh Sanctuary residents.

Being one of the few properties easily accessible from the **3 IT hubs** of Bangalore - Whitefield, Marathahalli Outer Ring Road, and Electronic City is a massive location advantage.

This property has been **naturally blessed with 12000 sq. ft. of teak grove** and it weaves into the design of this township.

Adarsh Sanctuary provides a widespread range of amenities for the elite few who have the opportunity of living in this green haven.

Villa Features

Each villa is designed with a contemporary aesthetic, lined with flat roofs and a ground floor that comes with stone cladding in the front portion of the villa.

Made with modern open plans, these Vaastu compliant villas have streamlined facades.

The living and dining area flow as a single space opening into a rear private garden with a wide deck and a landscaped setback area.

A floor dedicated to a family room and bedrooms, coupled with balconies and open terraces, overlooks the lush estate and paints a perfect picture of opulence and grandeur.

*Artistic Impression

A close-up photograph of a woodpecker, likely a Downy Woodpecker, peering out from a hole it has drilled into the bark of a tree trunk. The bird has a distinctive red cap, a black face with a white stripe through the eye, and a long, pointed beak. The background is a soft-focus green forest. A thin branch with several bright green leaves extends from the right side of the frame towards the center.

Panorama of the Sanctuary

A **breath-taking view** of Adarsh Sanctuary is intertwined into their Master Plan. **Uncover hidden treasures with a walk through the teak grove**, situated near the clubhouse and park. The front garden of the villas merge into pedestrian sidewalks and planting areas. A tree line promenade attached to a 50ft wide main access road and 30ft wide internal roads - is a commonality at the property. Each villa combines to form a **perfect balance of sensibility, safety and aesthetics.**

Sense & Sustainability

A well thought choice

Put together with a passion for detail, immense amount of thought has gone into the selection of materials and the design of pathways, roads, civic facilities and gardens that will transcend homeowners into a league similar to what is experienced in the most elite residential areas around the world. Adarsh Sanctuary envisions a comprehensive system that is well optimized and value-engineered to function efficiently guaranteeing hassle-free living.

Pedestrian Infrastructure

- Adarsh Sanctuary is designed to be a pedestrian-friendly, gated community.
- The infrastructure is designed to ensure safety, so you can rediscover the joy of walking.
- Crosswalks and stop signs are illuminated by state-of-the-art street lights.
- Green strips act as buffers with lush grass and beautiful trees all along the sidewalk.

Vehicular Network

Roads at Adarsh Sanctuary provide well designed primary vehicular access and an alternate drainage system. It is therefore detailed with various layers, so that it remains brand new and functional for decades.

Electrical & Telecommunication Network

To ensure that you see only unhindered views of green, water and sky, we have taken all electrical and telecommunication services below ground. A smartly designed network of underground fibre-optic cables ensures easy maintenance and up-gradation.

Storm Drain Network

Our state-of-the-art pipe and inlet system carries stormwater more effectively, eliminating the possibility of blockage and flooding. The entire volume of rainwater is then conveyed through gravity into a rainwater collection tank that is optimised to provide water sufficiency at all times whenever needed.

Sanitary Network

The sanitary network connects individual sites to the sewage treatment plant, with the help of a robust system that is safely buried underground.

Water System

At Adarsh Sanctuary we have designed a hassle-free, future-proof water conveyance system that is gravity fed. An overhead tank that is designed as a landmark will ensure clean uninterrupted water to every site in the community.

A photograph of a vibrant green lawn in the foreground, leading to a dense forest of tall, leafy trees in the background. The scene is captured in a wide-angle shot, emphasizing the expanse of the grass and the height of the trees. The lighting is soft, suggesting a shaded or overcast day.
